For Immediate Release

Datafarm broadens the scope of S-Cubed® with a new content management integration and regulatory compliance updates

Marlborough, MA December 7, 2009 — **Datafarm Inc.**, a world leading provider of electronic regulatory submission solutions for the Life Sciences industry, today released S-Cubed version 4.3 highlighting a new integration with OpenText Enterprise Content Management (ECM) and European Union v1.4 specifications updates.

S-Cubed is a leading electronic regulatory submission solution that conforms to the current International Conference on Harmonization (ICH) and regional requirements for delivering eCTD and NeeS submissions to the USA, Europe, Canada, Japan, and Taiwan regulatory agencies. This latest version of S-Cubed now supports the EU eCTD Module 1 v1.4. Sponsor companies are advised that as of January 1, 2010 when the new mandate comes into force, the EU eCTD Module 1 v1.4 must be used for all eCTD submissions for all European procedures. Any eCTD submissions provided from this date using any previous version of the EU Module 1 specification (v1.0, v1.1, v1.2.1 or v1.3) will not be accepted.

“The Datafarm development team has been working on the enhanced compliance feature since the EMEA released Version 1.4 of the EU Module 1 Specification in August of 2009,” said Shy Kumar, CEO at Datafarm. “S-Cubed users can rest assured that version 4.3 ensures compliance with the latest EU specification.”

In addition to the updated compliance requirements, Datafarm delivers integration with OpenText ECM to enable users a seamless link to S-Cubed from the content management system. This integration resulted from user and prospect requests and joins the ranks of leading content management integrations S-Cubed currently offers including EMC Documentum, Microsoft SharePoint, NextDocs, MaterControl and Qumas.
